Our Reach

At Pulse Medics, our presence stretches the broader East African community, with inquiries from countries outside this region including Zambia and Malawi to the south and Ethiopia, Somalia and Sudan to the North. Our customers include government hospitals, private hospitals and faith based hospitals. We also serve International and regional NGOs such as ICRC, Assist International, Abbots Labs, and Partners in Health (Rwanda) who offer aid to hospitals and Health Centers in this region.

Our Services WHAT WE OFFER!

1

Site survey and consultative discussion before contemplating installation of equipment

We arrange visits to the customer's site and survey the proposed project or equipment.

2

Installation and training of users by our qualified technical personnel

It is very satisfying both to the customer and to us to find that the equipment we have supplied is doing the work for which it was procured.

1

3

Preventive maintenance service

We offer this service for all equipment and plants that we supply.

4

Provision and Stocking of Spare Parts

In selecting equipment that we deal with, one important factor we look at is the continual availability of spare parts by the manufacturer.

5

Repairs

Most of our equipment carry a warranty, and we undertake to ensure that with regular maintenance, the equipment performs optimally even after the expiry of the warranty.

Airsep Oxygen Generating Plants

Manufactured in USA, Quality and long term value are built into every Airsep product for total customer satisfaction. Airsep's Global leadership in expertise to produce quality and reliable products is inspired by its advanced technology and innovative solutions for the ever rising Global oxygen demands.

Kenya and the rest of East Africa are blessed to have Pulse Medics Equipment Ltd representing Airsep Corporation in this region, to supply, install and give technical support, spares and training hospital biomed

Airsep's oxygen plants have been providing lifesaving medical oxygen to hospitals all over the world in the past 50 years

Airsep Oxygen Concentrators

These three are the most popular oxygen concentrators in the world.

Instead of buying expensive oxygen cylinders, save money by using these oxygen concentrators for all your oxygen therapy demands. Their prices are pocket friendly. They have many benefits compared to other concentrators in the market, such as:

Three years manufacturer's warranty

Low maintenance

Recommended for use in patient wards and homes

We provide technical support and spare parts

Dont buy more cylinders. Use SureFlow instead

SureFlow™ Oxygen Flow Station

Sureflow is a device that is used to direct oxygen flowing from one concentrator to be available for use by 5 users at the same time.

Expand your patients' comfort zone with this innovative and powerful device. Its advanced clinical performance makes it easy for patients to stay saturated, active and healthy.

Freestyle Comfort Portable Oxygen Concentrator

Unmatched Comfort and Convenience

Reliable

Freestyle comfort comes backed with a 3 year manufacturers warranty

Reduced Maintenance

Robust design features superior sieve bed technology reducing required maintenance.

Quiet

At 39.9 dBA the sound level is slightly more than a whisper

Compact & Lightweight

At only 10 in (25.4 cm) tall and 5 lbs (2.3 kg), it is similar in size to a book.

Easy-to-Read Display

Big fonts, multi-color LCD display and glow-in-the-dark

Enables Airline Travel

Meets requirements for commercial airline travel.

Flow Rate

Pulse Dose 1-5 liters per minute

Power Sources

Uses 3 power sources, namely AC Power: 100-240 VAC, 50-60Hz
DC Power: 11-18 VDC (motor vehicle charger) and Battery

We are Experts in Central Medical Gases Piping Systems for Hospitals

CENTRAL MEDICAL GAS PIPING SYSTEMS

This is the safest way of bringing oxygen to patients' bed. It is dangerous for patients and staff when high pressure cylinders are brought to patients rooms

Bed Head Unit

Suitable for ICU, HDU and executive patient rooms. Smartest and modern efficient way to provide medical gases in medical facilities.

Medical Gas Piping

We only use **degreased copper tubes** manufactured under BS EN 13485 Medical devices: Quality Management system. To maintain cleanliness, each pipe comes individually capped at both ends. Our technical team is highly qualified and experienced to undertake projects of any size anywhere in the East and central African region.

Degreased End Feed Copper Fittings

15mm Lock-valve

Regulator Flowmeter Humidifier Bottle

Area Valve Service Unit and Compact Multivalve

Single and double wall flowmeters

Containerised Oxygen Plant

Installation of Airsep Containerised Oxygen Plant Model ASJ 600FM at Nandi Sub-County Hospital

These turnkey packaged oxygen systems are ideal for customers without adequate space or those desiring ease of installation or portability. We have installed similar plants in Lodwar, Marsabit, Garissa, Mwingi and Nandi Hills.

Airsep Oxygen Refilling Systems

Our Oxygen Cylinder Refilling Plants enable customers to fill oxygen cylinders for existing needs or to supply others. Capacities range from 8-100s of cylinders per day.

Complete plants include a feed air compressor, refrigerated dryer or chiller, oxygen generator, oxygen compressor, and a cylinder filling rack. The oxygen compressor delivers oxygen at up to 2,200 psig (15,169 kPa or 151.6 barg) to a high pressure manifold capable of filling up to 10 cylinders at a time.
